

Work Boot Care Checklist

Daily

- Brush off dirt and mud
- Allow boots to air-dry (avoid heat)
- Remove insoles to reduce moisture

Weekly

- Clean uppers according to material:
 - **Leather:** wipe + leather cleaner
 - **Suede/Nubuck:** brush + eraser
 - **Nylon/Synthetic:** mild soap wipe
- Check for lace wear
- Inspect stitching and edges

Monthly

- **Leather:** apply conditioner
- **Suede/Nubuck:** apply waterproofing spray
- **Nylon/Synthetic:** refresh water repellent
- Treat interior for odor/moisture control

As Needed

- Replace laces
- Repair minor scuffs
- Reattach small pull tabs
- Glue small sole edge separations
- Deep-clean after heavy mud, concrete, or chemicals

Never Do

- Use direct heat to dry boots
- Use harsh cleaners or solvents
- Soak boots in water
- Ignore early damage

Proper care = longer lifespan, better comfort, and safer performance.
